Compression garments for burn scars Codopress® & Codopress® Premium

Rehabilitation of extensive burn scars.

- specialised compression product used for pressotherapy, i.e. supporting the treatment of scars by means of pressure
- made-to-measure – only individually designed and sewn clothing enables the product to meet the specific needs of the patient by ensuring sufficient compression force and the best treatment effect
- can be used in combination therapy with the Codosil™ ADHESIVE silicone dressing

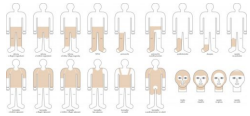

Application:

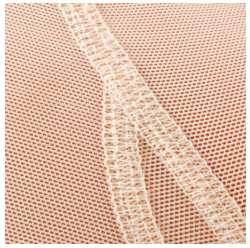

- they are used to prevent the formation of hyperplastic scars after burns and surgery as well as keloids

Types:

- Codopress® – compression products made of highly elastic breathable fabric
- Codopress® Premium – compression products made of highly elastic breathable fabric of increased utility values
