Modern solution for the operating theatre.

- composition of the elements needed to perform a specific medical procedure: dressing material, OP-drapes and covers for medical equipment, instruments and supplementary elements, surgical clothing for medical staff
- the set allows to develop a standard proceeding, and thus minimise the risk of error
- components targeted at the given procedure reduce the number of unused sterile material
- using one complete set reduces the time to prepare for the surgery and facilitates the performance of surgical procedures
- one package eliminates the cost of the packaging of individual components
- one package eliminates the need to open multiple single in-between packaging, and thus does not increases the risk of infecting a sterile product
- the contents can additionally be protected (wrapped) in a drape to facilitate the removal of the components in a sterile way
- TAG label

Application:

- for use during surgical procedures

Types (some examples):

- available only in a sterile version
- delivery set
- caesarean section set
- laparoscopy set
- laparotomy set
- knee arthroscopy set
- urology and gynaecology set
- angiography set

Packing:

- sets packed in sterilisation packaging and in a dispenser box facilitating the organisation and storage of products in a hospital, unless the client wishes otherwise

MD

Sterile devices are certified by the Notified Body TÜV Nord Polska Sp. z o.o. and bear the CE mark with number 2274
