MATOSET Specialist sets

Safety and comfort for minor medical procedures.

- composition of materials of gauze, nonwoven, plastic and other items used to the perform a given medical procedure
- the set allows to develop a standard proceeding, and thus minimise the risk of error
- set adjusted to individual customer needs
- components targeted at the given procedure reduce the number of unused sterile material
- using one complete set reduces the time to prepare for the surgery and facilitates the performance of surgical procedures
- one package eliminates the cost of the packaging of individual components
- one package eliminates the need to open multiple single in-between packaging, and thus does not increases the risk of infecting a sterile product
- they can be packed in a paper-film pouch, a soft blister or rigid blister packaging
- on the packaging there is a TAG label (except for soft blister packs)
