Sets of bedclothes

Sets of fabric bed linen made of cotton or elano-cotton of basis weight from 140 g to 160 g, which characterise with high tensile strength.

Thanks to well-matched fabric finishing processes, the products made of them do not change their original shape and appearance, even after washing at high temperatures.

The set can consist of items such as sheets, pillow cases, duvet covers and underpads.

We also recommend colorful cotton bed linen for neonatal and children’s wards. The bed linen received a positive opinion of the Institute of Mother and Child as a safe product for children. Positive Opinion of the Institute of Mother of Child No. Op-5321/2023, valid until 15/09/2026.

The fabrics have certificates of conformity with standards for textiles in the healthcare system and gained the certification for trustworthy textiles. On request, the bedclothes can have an inscription interwoven in the production process.
