Vinyl examination gloves Ambulex VINYL

Thinking of people who are allergic to latex.
Vinyl examination gloves are characterised by the absence of natural rubber latex.
Due to its composition and properties they are recommended for procedures with low risk of infection – with no presence of body fluids, blood and chemicals.

Ambulex VINYL – vinyl examination gloves, powder-free

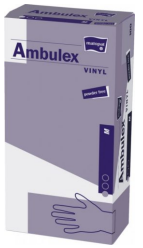

- powder-free
- inner polymer coating enables effortless damp and dry hand donning
- smooth surface does not affect the tactile sensitivity
- ambidextrous – fit both hands

Application:

- to perform diagnostic or therapeutic procedures
- gloves are intended for medical use, recommended for procedures where high mechanical force is not required and for non-invasive medical procedures in which there is no presence of body fluids, blood or chemicals
- these gloves are also indispensable for household chores and everyday duties

Types:

- non sterile powder-free
