## PROCEDURE SETS

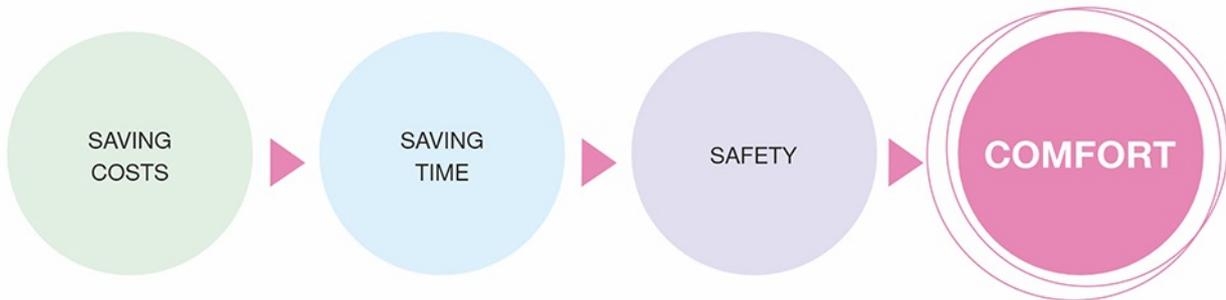

---

 TZMO SA

# Matoset

ready-to-use, complete, sterile sets  
with composition adjusted  
to a given medical procedure.

## COSTS

- more effective and efficient process of managing dressing material in the facility (ordering, storage, disposal)
- easier monitoring of cost: 1 used set = 1 procedure = 1 set to re-order
- perfectly selected composition for given procedure eliminates waste in the form of unused material
- no costs related to the preparation of self-made sets = labour cost, maintaining of inventory, sterilisation packaging, sterilisation process, mistakes, waste
- no costs related to the preparation of reusable elements for further use (washing, packing, sterilisation) = the entire composition of Matoset sets is disposable
- rigid blister packs can be used as chambers for liquids, which eliminates the need for additional containers

## TIME

- a sterile set = always and immediately ready for use in all conditions
- shortening the preparation time for the procedure = improved work efficiency = more patients served
- a TAG label enables pasting data into medical documentation and keeping electronic records (EAN code) instead of time-consuming re-writing of the composition

## SAFETY

- certified medical devices
- sterility guaranteed by a validated and monitored manufacturing process
- certainty of the set composition and high quality of elements
- minimising the risk of infection by reducing the number of intermediate packaging
- transferring responsibility for quality and sterility to the manufacturer (TZMO SA)
- standardisation of hospital procedures = elimination of possible errors, e.g. forgetting to put on gloves. Standardisation forces the learning of repetitive and correct habits.

## COMFORT

- comfort of work enables focus on the activities related to the medical side of the procedure, and not the time-consuming completion of the necessary dressing material
- always complete composition for a given procedure
- individual set elements are arranged in the order in which the procedure takes place
- the patient has a guarantee of safety and a sense of individual treatment

# RIGID BLISTER

more than packaging

✓ printed opening direction

✓ rounded edges eliminate the risk of pricking  
cut corners – less risk of crushing and breaking the film

✓ sterilisation indicator informing about the completion of the process and the sterilisation method used, in accordance with the requirements of EN ISO 11140-1:2014

✓ deep blister chambers with dividers to organise the material in the packaging, segregate clean and dirty material and can be used as containers for liquids – from 1 to 3 chambers to choose from

✓ in the corners 2 embossings in the film facilitating the separation of the paper from the film during opening

✓ appropriate thickness of the packaging and strength of seals in accordance with the EN 868-5:2019-01 standard ensures the sterility of the product, and at the same time enables easy, dust-free opening of the packaging

✓ colour marking of metal instruments facilitates identification and differentiation from reusable tools

## table of contents\*

---

OP-field disinfection	5
applying / changing a dressing	6-8
applying / removing sutures / skin staples	8-10
delivery	10-11
catheterisation	11-13
dialysis with a central venous catheter	13
dialysis with an arteriovenous fistula	14-16
intravenous cannulation	17
drip connection	17
lumbar puncture	18
central line insertion	19-20
universal sets	20-21
tracheostomy sets	22

\*offer of selected procedure sets

## Matoset SET FOR OP-FIELD DISINFECTION

Rigid blister  
1-chamber

### MA-991-ZBB2-001

	quantity
gauze tampon ball 20 cm × 20 cm	5
examination glove powder-free L	2
plastic sponge forceps 19 cm	1

#### ADVANTAGES

- spacious blister chamber – container for disinfecting liquid
- long sponge forceps – safe performance of the procedure
- handy packaging – ease of carrying out the procedure

## Matoset SET FOR OP-FIELD DISINFECTION

Paper-film  
Pouch

### MA-991-ZESA-529

	quantity
gauze tampon ball 50 cm × 50 cm	3
round plastic container 250 ml	1
plastic sponge forceps 24 cm	1

#### ADVANTAGES

- gauze tampons placed directly in a transparent plastic container
- long sponge forceps – safe performance of the procedure

## Matoset DRESSING SET

### MA-991-ZAB2-002

	quantity
gauze tampon ball 20 cm × 20 cm	6
anatomical plastic forceps 11 cm	1

Rigid blister  
2-chamber

### ADVANTAGES

- universal use for many treatment procedures
- two blister chambers – easy separation of clean and dirty material and the possibility of using one of the chambers as a container for liquids

## Matoset DRESSING CHANGE SET

### MA-991-ZAB2-001

	quantity
nonwoven swab 7.5 cm × 7.5 cm	2
gauze tampon ball 20 cm × 20 cm	6
anatomical plastic forceps 13 cm	2

Rigid blister  
3-chamber

### ADVANTAGES

- different colours of forceps – one colour for the clean and the other for the dirty part of the procedure
- three blister chambers – easy separation of clean and dirty material and the possibility of using the chambers as containers for liquids

## Matoset DRESSING CHANGE SET

Rigid blister  
3-chamber

### MB-991-ZBB2-002

	quantity
nonwoven swab 7.5 cm × 7.5 cm	2
gauze tampon ball 20 cm × 20 cm	6
anatomical plastic forceps 13 cm	2
surgical blade no.11	1
examination glove powder-free M	2
film waste bag with adhesive closure	1

#### ADVANTAGES

- sterile gloves available first after opening the set for safe procedure execution
- blade for surgical preparation of the wound
- bag for contaminated medical waste
- different colours of forceps – one colour for the clean and the other for the dirty part of the procedure
- three blister chambers – easy separation of clean and dirty material and the possibility of using the chambers as containers for liquids

waste bag

## Matoset DRESSING CHANGE SET

Rigid blister  
3-chamber

### MA-991-ZEB2-295

	quantity
nonwoven swab 7.5 cm x 7.5 cm	6
gauze tampon ball 20 cm x 20 cm	6
anatomical plastic forceps	2
surgical blade no.11	1
solution for wound irrigation Prontosan 40 ml	1

#### ADVANTAGES

- three blister chambers – easy separation of clean and dirty material and the possibility of using the chambers as containers for liquids
- different colours of forceps – one colour for the clean and the other for the dirty part of the procedure
- blade for surgical preparation of the wound

## Matoset DRESSING CHANGE SET

### MA-991-ZEB2-296

	quantity
nonwoven swab 7.5 cm x 7.5 cm	6
gauze tampon ball 20 cm x 20 cm	6
anatomical plastic forceps 13 cm	2
surgical blade no.11	1
examination glove powder-free M	4
solution for wound irrigation Prontosan 40 ml	1
film waste bag with adhesive closure	1

Rigid blister  
3-chamber

### ADVANTAGES

- three blister chambers – easy separation of clean and dirty material and the possibility of using the chambers as containers for liquids
- different colours of forceps – one colour for the clean and the other for the dirty part of the procedure
- blade for surgical preparation of the wound
- bag for contaminated medical waste

## Matoset SUTURE SET

### MA-991-ZBB2-011

	quantity
nonwoven swab 7.5 cm x 7.5 cm	5
gauze tampon ball 20 cm x 20 cm	3
metal needle holder 13 cm	1
metal scissors sharp-sharp 11 cm	1
metal surgical forceps 12.5 cm	1
plastic anatomical forceps 13 cm	1
film-coated nonwoven drape 75 cm x 45 cm (for wrapping part of the set)	1
film-coated nonwoven drape 60 cm x 50 cm with 8 cm opening and adhesive tape	1

Rigid blister  
3-chamber

### ADVANTAGES

- special arrangement of elements in the blister pack: tampons and forceps for wound disinfection are placed on top of the set, and the elements intended for the clean part of the procedure are additionally wrapped in a sterile drape
- a separate chamber for disinfectant
- metal disposable instruments – precise suturing

## Matoset SUTURE REMOVAL SET

Rigid blister  
3-chamber

### MB-991-ZBB2-003

	quantity
gauze tampon ball 20 cm × 20 cm	6
plastic anatomical forceps 13 cm	1
Stitch Cutter blade 11 cm	1
examination glove powder-free M	2

### ADVANTAGES

- practical Stitch Cutter – easy and safe cutting of sutures
- three blister chambers – keep the set elements in order and can be used as containers for liquids

## Matoset SUTURE REMOVAL SET

Rigid blister  
2-chamber

### MA-991-ZBB2-009

	quantity
gauze tampon ball 20 cm × 20 cm	6
metal scissors sharp-sharp 11 cm	1
metal anatomical forceps 12.5 cm	1
examination glove powder-free M	2

### ADVANTAGES

- metal forceps – precise grip of the sutures
- metal scissors sharp-sharp – precise cutting of the sutures
- two blister chambers – easy separation of clean and dirty material and the possibility of using the chambers as containers for liquids

## Matoset SKIN STAPLE REMOVAL SET

### MA-991-ZBB2-013

	quantity
gauze swab 7.5 cm × 7.5 cm	4
skin staple remover	1
examination glove powder-free M	2

Rigid blister  
1-chamber

### ADVANTAGES

- nitrile, powder-free gloves – especially recommended for people sensitive to latex or powdering agent
- skin staple remover – guarantee of safe and quick removal of staples

## Matoset DELIVERY SET

### MA-991-ZES2-526

	quantity
nonwoven swab 7.5 cm × 7.5 cm	10
nonwoven swab 10 cm × 20 cm	5
gauze tampon ball 30 cm × 30 cm	5
metal episiotomy scissors 18 cm	1
metal umbilical scissors 10.5 cm	1
plastic sponge forceps 24 cm	1
umbilical cord clamp	2
plastic kidney dish 700 ml	1
examination glove powder-free M	2
film-coated nonwoven drape 150 cm × 90 cm	1
leg cover 120 cm × 80 cm	1

Paper-film  
Pouch

### ADVANTAGES

- disposable metal instruments – precise incision of the perineum and cutting the umbilical cord

## Matoset UMBILICAL CORD CLAMP REMOVAL SET

Rigid blister  
1-chamber

### MA-991-ZBB2-015

	quantity
gauze swab 7.5 cm × 7.5 cm	3
umbilical cord clamp cutter	1

### ADVANTAGES

- umbilical cord clamp cutter – guarantee of safe and quick cutting of the clamp

## Matoset CATHETER SET

Rigid blister  
1-chamber

### MB-991-ZBB2-004

	quantity
gauze tampon ball 20 cm × 20 cm	6
anatomical plastic forceps 13 cm	1
round plastic container 125 ml	1
Luer syringe 10 ml	1
injection needle 1.2 mm × 40 mm	1
latex Foley catheter* (various product codes depending on the FG catheter size)	1
14  16  18  20 	
urine bag with valve 2 l	1
examination glove powder-free M	2
film-coated nonwoven drape 60 cm × 50 cm	1
film-coated nonwoven drape 60 cm × 50 cm with 5 cm opening and a slit	1

### ADVANTAGES

- complete set equipped with a catheter, urine bag, container for disinfectant, syringe and needle to fill the balloon
- colour coding of catheter size

- \*  Foley 14 MA-991-ZBB2-012
-  Foley 16 MA-991-ZBB2-004
-  Foley 18 MA-991-ZBB2-005
-  Foley 20 MA-991-ZBB2-006

## Matoset CATHETER SET

### MA-991-ZCB2-001

	quantity
gauze swab 7.5 cm × 7.5 cm	8
gauze tampon ball 20 cm × 20 cm	5
plastic anatomical forceps 13 cm	1
plastic pean forceps 13 cm	1
round plastic container 125 ml	1
lubricating gel in a syringe 6 ml*	1
sterile water with 10% glycerin in a syringe 10 ml	1
examination glove powder-free M	2
film-coated nonwoven drape 60 cm × 50 cm	1
film-coated nonwoven drape 60 cm × 50 cm with 5 cm opening and a slit	1

\* MA-991-ZCB2-003 – the lubricant additionally contains 2% lidocaine (local anaesthetic) and 0.25% chlorhexidine (antiseptic)

### ADVANTAGES

- set equipped with: a syringe with sterile water with 10% glycerin solution to fill the catheter (glycerin provides additional sealing of the balloon in the catheter) and a syringe with lubricating gel (easier application of the catheter)
- nitrile, powder-free gloves – especially recommended for people sensitive to latex or powdering agent

Rigid blister  
1-chamber with additional  
elements packed separately

## Matoset CATHETER SET

### MB-991-ZCB2-002

	quantity
gauze swab 7.5 cm × 7.5 cm	8
gauze tampon ball 20 cm × 20 cm	5
plastic anatomical forceps 13 cm	1
plastic pean forceps 13 cm	1
round plastic container 125 ml	1
lubricating gel in a syringe 6 ml*	1
sterile water with 10% glycerin in a syringe 10 ml	1
solution for wound irrigation Prontosan 40 ml	1
examination glove powder-free M	2
film-coated nonwoven drape 60 cm × 50 cm	1
film-coated nonwoven drape 60 cm × 50 cm with 5 cm opening and a slit	1

\* MB-991-ZCB2-004 – the lubricating gel additionally contains 2% lidocaine (local anaesthetic) and 0.25% chlorhexidine (antiseptic)

### ADVANTAGES

- set equipped with: a syringe with sterile water with 10% glycerin solution to fill the catheter (glycerin provides additional sealing of the balloon in the catheter) and a syringe with lubricating gel (easier application of the catheter)
- nitrile, powder-free gloves – especially recommended for people sensitive to latex or powdering agent

Rigid blister  
1-chamber with additional  
elements packed separately

## Matoset CATHETER SET

Rigid blister  
2-chamber

### MB-991-ZAB2-003

quantity

gauze tampon ball 20 cm × 20 cm	6
plastic anatomical forceps 13 cm	1
examination glove powder-free M	2
film-coated nonwoven drape 60 cm × 50 cm	1
film-coated nonwoven drape 60 cm × 50 cm with 5 cm opening and a slit	1

### ADVANTAGES

- separate chamber for disinfectant
- drape with opening and a slit – optimal draping of the catheterised area

## Matoset DIALYSIS SET

Soft blister  
2-piece with perforation

### MA-991-ZES2-494

quantity

START	
gauze swab 7.5 cm × 7.5 cm	4
examination glove powder-free S*	2
film-coated nonwoven drape 45 cm × 45 cm with a slit	1
STOP	
nonwoven swab 7.5 cm × 7.5 cm	4
self-adhesive dressing for securing the catheter 16 cm × 5.5 cm	1
examination glove powder-free S*	2

\* MA-991-ZES2-495 - with M size gloves

### ADVANTAGES

- 2-piece dialysis set to start and end the procedure
- self-adhesive dressing in the form of a pocket for securing the vascular catheter
- nitrile, powder-free gloves – especially recommended for people sensitive to latex or powdering agent

## Matoset DIALYSIS SET

**MA-991-ZEST-385**

quantity

START	
nonwoven swab 7.5 cm × 7.5 cm	3
self-adhesive nonwoven dressing for cannula fixation 8 cm × 5.8 cm	2
film-coated nonwoven drape 60 cm × 50 cm	1
STOP	
nonwoven swab 7.5 cm × 7.5 cm	4

Soft blister  
2-piece with perforation

### ADVANTAGES

- 2-piece dialysis set to start and end the procedure
- self-adhesive dressings to secure and hold the cannulas in place at the puncture sites

## Matoset DIALYSIS SET

**MA-991-ZEST-487**

quantity

START	
nonwoven swab 7.5 cm × 7.5 cm	4
self-adhesive nonwoven dressing for cannula fixation 8 cm × 5.8 cm	2
nonwoven adhesive tape with perforation 15 cm × 2 cm	2
examination glove powder-free S*	2
nonwoven drape 45 cm × 40 cm	1

\* MA-991-ZEST-458 – with M size gloves

Soft blister  
1-chamber

### ADVANTAGES

- self-adhesive dressings to secure and hold the cannulas in place at the puncture sites

## Matoset DIALYSIS SET

**MA-991-ZAS2-004**

quantity

**START**

nonwoven swab 7.5 cm × 7.5 cm	4
self-adhesive nonwoven dressing for cannula fixation 8 cm × 5.8 cm	2
nonwoven adhesive tape with perforation 15 cm × 2 cm	2
examination glove powder-free S*	2
film-coated nonwoven drape 50 cm × 35 cm	1

\* MA-991-ZAS2-001 – with M size gloves

Soft blister  
1-chamber

**ADVANTAGES**

- self-adhesive dressings to secure and hold the cannulas in place at the puncture sites
- nitrile, powder-free gloves – especially recommended for people sensitive to latex or powdering agent

## Matoset DIALYSIS SET

**MA-991-ZEST-488**

quantity

**STOP**

nonwoven swab 7.5 cm × 7.5 cm	6
nonwoven adhesive tape with perforation 15 cm × 2 cm	4
examination glove powder-free S*	2
examination glove powder-free L	1

\* MA-991-ZEST-459 – with latex gloves size M / MA-991-ZAS2-002 – with nitrile gloves size M

Soft blister  
1-chamber

**ADVANTAGES**

- additional glove for the patient - the patient can, in a sterile way, hold the pressure dressing after the procedure is completed

**MA-991-ZES2-232**

quantity

START	
nonwoven swab 7.5 cm × 7.5 cm	6
self-adhesive nonwoven dressing for cannula fixation 8 cm × 5.8 cm	2
nonwoven adhesive tape with perforation 15 cm × 2 cm	4
examination glove powder-free S*	2
film-coated nonwoven drape 50 cm × 35 cm	1
STOP	
nonwoven swab 7.5 cm × 7.5 cm	4
self-adhesive nonwoven dressing 7.2 cm × 5 cm	2
examination glove powder-free S*	2
examination glove powder-free L	1

Soft blister  
2-piece with perforation

\* MA-991-ZES2-233 – with L size gloves

**ADVANTAGES**

- 2-piece dialysis set to start and end the procedure
- self-adhesive dressings to secure and hold the cannulas in place at the puncture sites
- additional glove for the patient – the patient can, in a sterile way, hold the pressure dressing after the procedure is completed
- self-adhesive island dressings for securing puncture sites after removal of the cannulas

## Matoset IV CANNULA SET

Rigid blister  
2-chamber

### MA-991-ZBB2-014

quantity

gauze swab 7.5 cm × 7.5 cm	5
self-adhesive film-nonwoven dressing for cannula fixation 8 cm x 5.8 cm	1
examination glove powder-free M	2
film-coated nonwoven drape 45 cm × 45 cm	1
tourniquet	1

### ADVANTAGES

- two-chamber blister has a segregation function
- self-adhesive dressing on a transparent film carrier allows observation of the injection site
- nitrile, powder-free gloves – especially recommended for people sensitive to latex or powdering agent

## Matoset DRIP INFUSION SET

Paper-film  
Pouch

### MA-991-ZESA-608

quantity

nonwoven swab 7.5 cm x 7.5 cm	2
examination glove powder-free M	2
self-adhesive film-nonwoven dressing for cannula fixation 5.8 cm x 8 cm	1
tourniquet	1

### ADVANTAGES

- self-adhesive dressing on a transparent foil carrier enables observation of the puncture site
- tourniquet – enables venous puncture

## Matoset LUMBAR PUNCTURE SET

### MA-991-ZBB2-008

quantity

nonwoven swab 7.5 cm × 7.5 cm	10
self-adhesive nonwoven dressing 7.2 cm × 5 cm	1
anatomical plastic forceps 13 cm	1
Luer syringe 3 ml	1
Luer Lock syringe 5 ml*	1
injection needle 0.5 mm × 25 mm	1
injection needle 1.2 mm × 40 mm	1
film-coated nonwoven drape 75 cm × 45 cm	1
film-coated nonwoven drape 60 cm × 50 cm with 10 cm opening and adhesive tape	1

Rigid blister  
3-chamber

\* MA-991-ZBB2-020 – with 5 ml Luer syringe

### ADVANTAGES

- three blister chambers – keep the set elements in order
- barrier drape with adhesive around the opening and in 2 corners – optimal and secure draping of the puncture site
- self-adhesive island dressing protects the puncture site

## Matoset LUMBAR PUNCTURE SET

### MA-991-ZESA-410

quantity

gauze swab 7.5 cm × 7.5 cm	8
Luer Lock syringe 5 ml	1
Luer Lock syringe 10 ml	1
Luer Lock syringe 20 ml	1
injection needle 0.5 mm × 25 mm	1
injection needle 1.2 mm × 40 mm	1
plastic kidney dish 700 ml	1
film-coated nonwoven drape 45 cm × 45 cm	1
film-coated nonwoven drape 75 cm × 45 cm	1
film-coated nonwoven drape 60 cm × 50 cm with 10 cm opening and adhesive tape	1

Paper-film  
Pouch

### ADVANTAGES

- barrier drape with adhesive around the opening and in 2 corners – optimal and secure draping of the puncture site
- elements of the set placed in a plastic container

Rigid blister  
2-chamber

**MA-991-ZBB2-010**

quantity

gauze swab 7.5 cm × 7.5 cm	10
gauze tampon ball 20 cm × 20 cm	10
metal needle holder 13 cm	1
anatomical plastic forceps 13 cm	1
surgical blade no. 11	1
Luer syringe 10 ml	1
Luer syringe 20 ml	1
injection needle 0.8 mm × 40 mm	1
injection needle 1.2 mm × 40 mm	1
film-coated nonwoven drape 75 cm × 45 cm (for wrapping part of the set)	1
film-coated nonwoven drape 75 cm × 45 cm with 8cm opening and adhesive tape	1

ADVANTAGES

- special arrangement of elements in the blister pack: tampons and forceps for disinfection of the puncture site are placed loosely in the blister pack, and the elements intended for the clean part of the procedure are additionally wrapped in a sterile drape
- separated chamber for disinfectant
- metal needle holder – ensures precise and secure grip of the needle

## Matoset CENTRAL LINE INSERTION SET

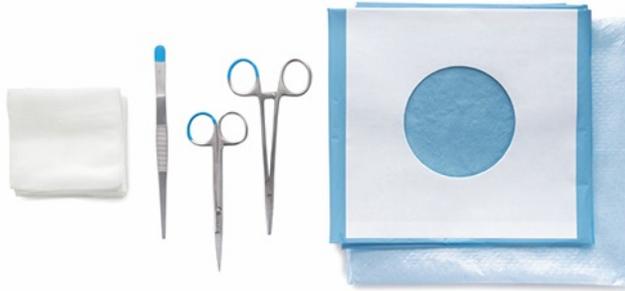

### MA-991-ZES2-430

quantity

gauze swab 7.5 cm × 7.5 cm	10
metal needle holder 13 cm	1
metal scissors sharp-sharp 11 cm	1
metal anatomical forceps 14 cm	1
film-coated nonwoven drape 90 cm × 75 cm (for wrapping the set)	1
film-coated nonwoven drape 90 cm × 75 cm with 8 cm opening and adhesive tape	1

Paper-film Pouch

### ADVANTAGES

- metal needle holder – ensures precise and secure grip of the needle
- metal forceps – precise grip of the sutures
- metal scissors sharp-sharp – precise cutting of the sutures

## Matoset SPECIALIST SET

### MA-991-ZES2-184

quantity

gauze swab 7.5 cm × 7.5 cm	5
nonwoven-gauze absorbent swab 10 cm × 7.5 cm	1
anatomic plastic forceps 13 cm	1
plastic kidney dish 700 ml	1

Paper-film Pouch

### ADVANTAGES

- universal composition allows for a wide range of use
- highly absorbent nonwoven-gauze swab

## Matoset SPECIALIST SET

## MA-991-ZEST-067

quantity

nonwoven swab 5 cm × 5 cm	5
anatomical plastic forceps 13 cm	1
round plastic container 125 ml	1

Soft blister  
1-chamber

## ADVANTAGES

- universal composition allows for a wide range of use
- plastic container with a 25 ml graduation enables identification of the volume of liquids

## Matoset SPECIALIST SET

## MA-991-ZEST-049

quantity

gauze swab 10 cm x 10 cm	5
gauze tampon ball 20 cm x 20 cm	5
anatomical plastic forceps 13 cm	1
round plastic container 125 ml	1
plastic kidney dish 700 ml	1

Paper-film  
Pouch

## ADVANTAGES

- universal composition allows for a wide range of use
- plastic container with a 25 ml graduation enables identification of the volume of liquids

## Matoset TRACHEOSTOMY SET

### MA-991-ZEB2-294

	quantity
gauze swab 7.5 cm x 7.5 cm	5
nonwoven swab with O cut 10 cm x 10 cm	2
anatomical plastic forceps 13 cm	1

Rigid blister  
1-chamber

#### ADVANTAGES

- nonwoven swabs with a slit and O cut secure the tracheostomy tube

## Matoset TRACHEOSTOMY SET

### MA-991-ZEB2-282

	quantity
gauze swab 7.5 cm x 7.5 cm	5
nonwoven swab with O cut 10 cm x 10 cm	2
anatomical plastic forceps 13 cm	1
tracheostomy tube holder	1

Rigid blister  
1-chamber

#### ADVANTAGES

- nonwoven swabs with a slit and O cut secure the tracheostomy tube
- additional holder stabilises the tracheostomy tube
